Professional Summary

Computer Science master student (graduating Jan 2027) with cloud engineering experience seeking a student worker role to deepen expertise in multi-cloud infrastructure and modern DevOps practices. Recently reduced Azure resource deployment time by 99% (from 2-3 weeks to 15 minutes) through Bicep Infrastructure as Code automation. Passionate about building scalable cloud solutions, exploring agentic systems, and working with data pipelines.

Education

MSc	Roskilde University , Computer Science	2025 – 2027
	Pre-thesis research: Ship operations congestion at Copenhagen port based on big AIS data	
MSc	IT University of Copenhagen , Software Development	2018 – 2021
	Thesis: LLM Claim Generation in Danish, AI & Machine Learning. Grade: 10/12 - Curated and preprocessed 50K+ Danish text samples for the training dataset	
PBA	Erhvervsakademi København , Product Development	2017 – 2018
	GPA: 10/12	
BSc	University Salgado de Oliveira , Production Engineering	2011 – 2015
	GPA: B - Focus: Operations research, statistical process control, optimization algorithms	

Professional Experience

Everllence , Cloud Data Engineer - Student Assistant	Copenhagen July 2025 – Present
- Analyzed data access patterns and implemented LRU caching strategy using Python, improving application response times for the users - Designed modular parameterized Bicep templates for Infrastructure as Code, reducing deployment time from 2-3 weeks to 15 minutes through automation - Contribute to software data products development (primarily Python), ensuring data availability for business intelligence and decision-making	
Eficode , DevOps Engineer	Copenhagen 2021 – 2024
- Automated server provisioning and configuration management, reducing manual deployment effort by improving system reliability for business operations - Implemented infrastructure as code practices using Git for version control, ensuring audit trails, rollback capabilities, and compliance with enterprise standards - Collaborated with product teams and business stakeholders to translate technical capabilities into business value	
Siemens Gamesa , DevOps Consultant (via Eficode)	Copenhagen 2022 – 2023
- Established and optimized CI/CD pipelines using Azure DevOps, supporting teams with faster time-to-market - Implemented validation and rollback procedures, ensuring business continuity during system updates	

Additional Experience

IT University of CPH TA in Mobile Android App Development - Copenhagen	2020 - 2021
Hotel Denmark Breakfast Chef & Waitress - Copenhagen	2019 - 2021
ICTS Delta Airlines Security Agent - Copenhagen	2019 - 2019
Beyond Leather Product & Business Development Intern - Copenhagen	2018 - 2019
O Tempo Restaurant Waitress - Copenhagen	2017 - 2018
J. Macêdo Supply Chain Data Analyst - Brazil	2011 - 2014
Money Express Senior Business Analyst - Portugal	2007 - 2010
Poko Pano Store Manager - Portugal	2000 - 2007

Skills

Technical: Python (pandas, NumPy, scikit-learn, PyTorch), Java, SQL, Excel/VBA, CI/CD, Git/GitHub, Linux, Ansible, Bicep, Azure DevOps, Jenkins, GH Actions, MS Teams, Jira, Slack, Confluence, Azure Boards, Jupyter, Databricks

Business Systems: SAP ECC MM, Power BI, MS Fabric

Languages: English (Fluent), Portuguese (Native), Spanish (Intermediate)

Certifications

Python AI Development

Microsoft Azure Fundamentals (AZ-900)

Microsoft OpenHack: DevOps

Training

Docker, Kubernetes, Helm, ArgoCD, Istio

Implementing a Data Analytics Solution with Azure Databricks (DP-3011)

Designing and Implementing Microsoft DevOps Solutions (AZ-400)

PRINCE2 - Project Management, SAFe - Scaled Agile Framework

Leadership & Notable Achievements

Paris R&D Visit (Academic Excellence): Selected as best semester project team at Københavns Erhvervsakademi for "Green Cabin Concept Project" in partnership with Embraer and Peugeot—awarded trip to Peugeot's R&D headquarters in Paris

Process Implementation Leadership: Designed and implemented employee training program for identifying counterfeit Euro bills and handling procedures at Money Express

Budget Management: Successfully created and managed regional supply chain budget of USD \$2M at J. Macêdo, delivering 8% cost savings while maintaining service levels

Academic Recognition: Bachelor's project plan (based on PMBOK 2014) received honors grade and was adopted by university administration for implementation
