

# Monica Souza

ENGINEER WITH DEVOPS, DATA ANALYTICS, AND BUSINESS BACKGROUND

✉ sds.moni@gmail.com

📍 Copenhagen, Denmark

☎ +4591866882

## Profile

I am an Engineer from Brazil based in Copenhagen. With a digital master's degree fused with a production engineer bachelor's degree, I will bring to the team a solid foundation in data-driven decisions, continuous improvement, customer service, and sales. From my DevOps Engineer position at Eficode, I bring hands-on experience in infrastructure automation and data pipeline optimization, ensuring seamless data availability. My diverse technical toolkit includes Python, SQL, CI/CD, PRINCE2, and Azure Fundamentals Certification, making me adept at bridging the gap between business and IT. As a Supply Chain Data Analyst in the food manufacturing industry, I had hands-on experience extracting data from the SAP ECC MM module, transforming, loading, and reporting KPIs to the team, managers, and other key stakeholders in the supply chain department.

With a Bachelor's degree GPA B and master's thesis in NLP, AI, and Machine Learning grade 10 (7-points scale), I demonstrate that I am ambitious and brave. I will always reach for excellence without losing sight of teamwork, leveraging my aptitude for intercultural cross-collaboration and stakeholder management. I am a technically curious and open-to-new-experience professional whose favorite question to ask in a meeting is: How can I help? I wholeheartedly want to create innovative solutions and drive continuous improvement. I believe I will be a valuable addition to your team and can apply my knowledge and contribute meaningfully to the company's mission.

## Employment History

DevOps Engineer, Eficode, Copenhagen

August 2021 — May 2024

- Responsible for implementing, automating, and configuring infrastructure components such as servers, storage, and virtualization technologies using Ansible, resulting in faster deployment and easier maintenance.
- Established and maintained CI/CD pipelines to automate the build, test, and deployment processes for the software applications that improved system reliability and uptime.
- Collaborated with the development teams to integrate code repositories and build systems.
- Fostered effective collaboration and communication between development, operations, and other cross-functional teams.

Supply Chain Data Analyst, J. Macedo SA, Salvador

August 2011 — August 2014

- Responsible for collecting, analyzing, and interpreting supply chain data to identify trends, patterns, and opportunities for improvement.
- Developed reports, metrics, and dashboards to provide visibility into supply chain performance and key performance indicators (KPIs)

Traveling, dancing, reading, cooking, Netflixing.

- Monitored inventory levels and analyze demand patterns to optimize inventory holding costs while ensuring sufficient stock availability;
- Collaborated with sales, marketing, and operations teams to align demand forecasts with business objectives and optimize supply chain responsiveness.
- Collaborated with cross-functional teams to implement process improvements, such as lean practices, or automation solutions.

### Business Development Intern, Beyond Leather, Copenhagen

*January 2018 — September 2018*

- Developed and maintained relationships with key stakeholders to facilitate sales and identify new business opportunities.
- Provided technical product demos to prospective customers highlighting the product's features and capabilities.
- Developed sales presentations that demonstrated the value proposition of the product.

### Business Analyst, Money Express Lda, Lisbon

*July 2007 — October 2010*

- Responsible for providing insights into financial performance, cost optimization, and revenue growth to support strategic decision-making.
- Collaborated with relevant departments to develop annual budgets, and ensure alignment with the organizational goals and objectives.
- Monitored budget performance, tracked expenditures, and provided variance analysis to identify improvement and cost-saving opportunities.
- Collaborated with cross-functional teams, including finance, accounting, and executive management, to gather financial data, share insights, and align financial strategies.
